
WAVE
INTERCOM
User Guide

What is Wave Intercom?

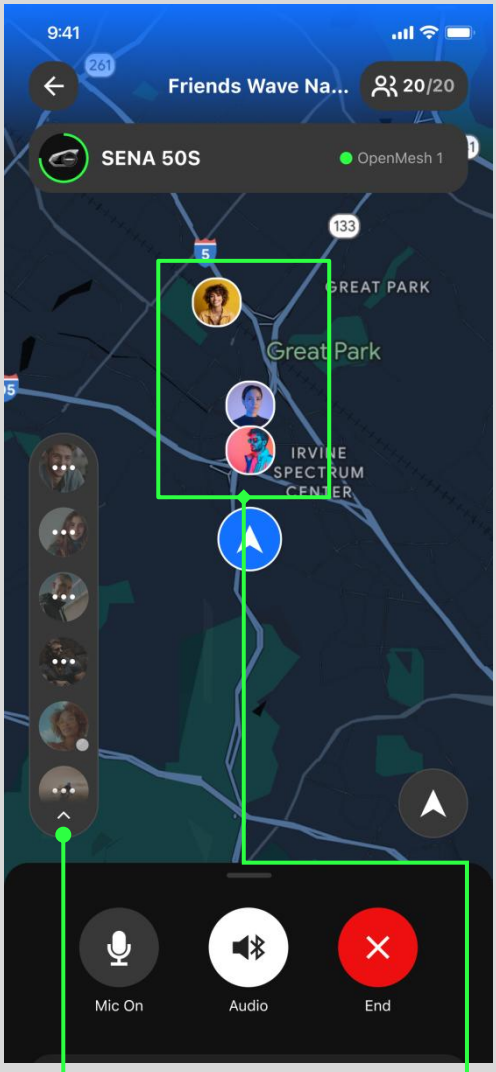

Wave Intercom enables communication via cellular data, offering two types of communication.

Geo Wave
Open communication based on the distance between users

Wave Zone
All users within 5 miles (8 kilometers) are randomly connected.

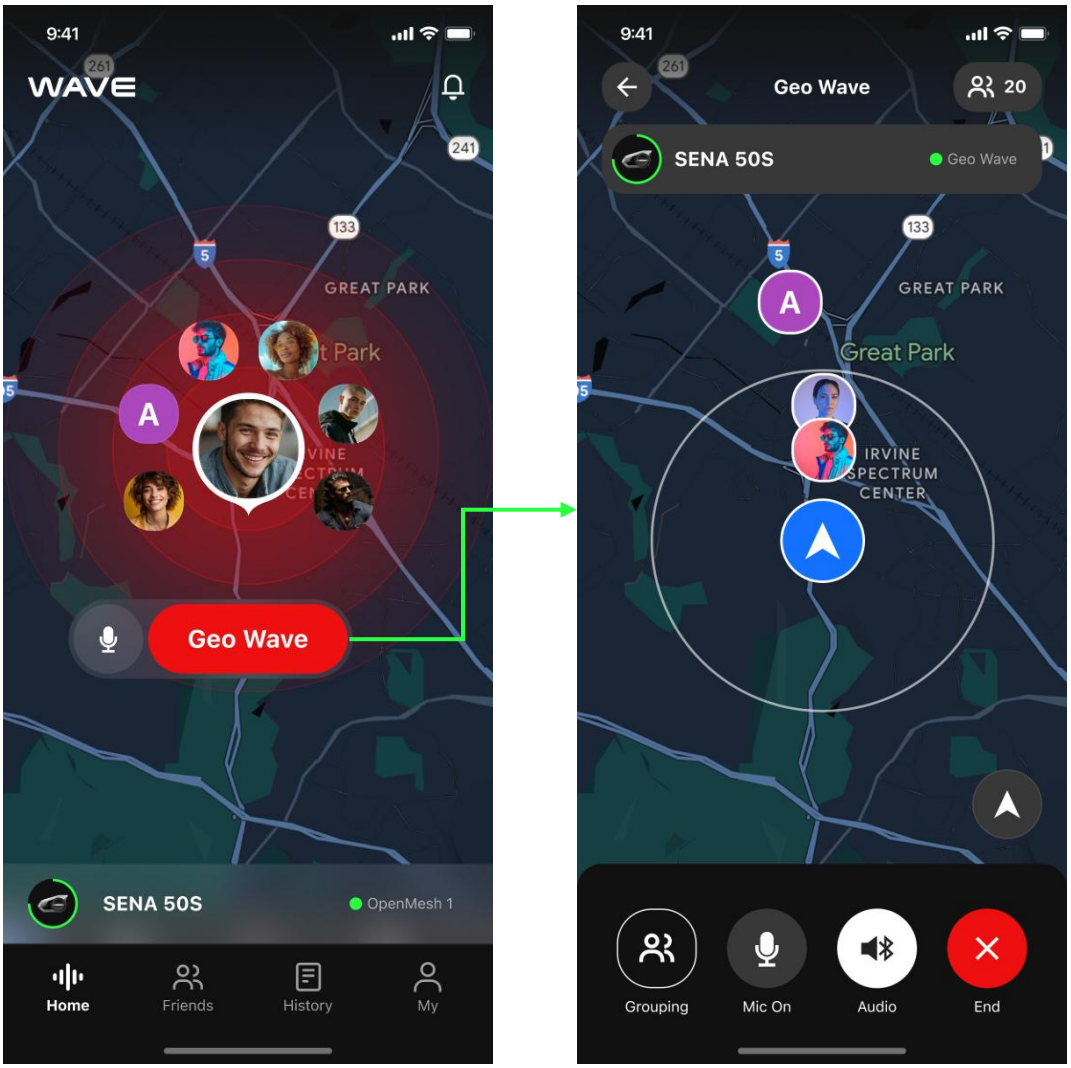

Friends Wave
Private communication among selected users

Members who haven't joined the group yet

Members currently in the group conversation

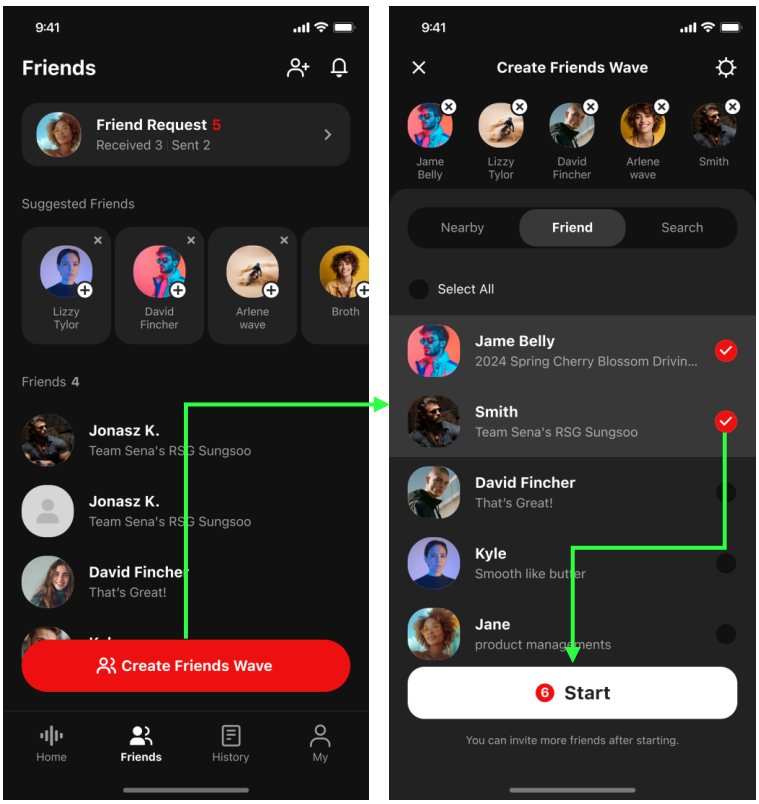

How to Start Geo Wave

1. Open the Wave Intercom App.
2. Start Wave Intercom by double tapping the Mesh Intercom button on your compatible Sena device.
3. When the map appears, you can start talking to anyone using Wave Intercom.
4. You can switch between Wave Intercom and Mesh Intercom by tapping the Jog Dial or the Center button once.

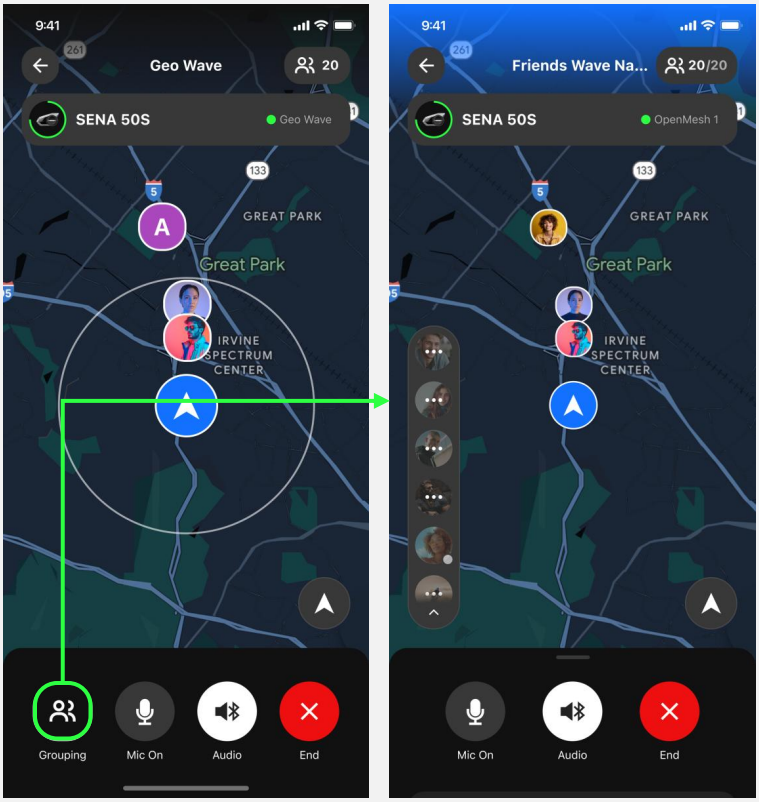

***Note:** You can also start by tapping the **Geo Wave** button in the App.

How to Start Friends Wave

- **Start on Friends Tab**

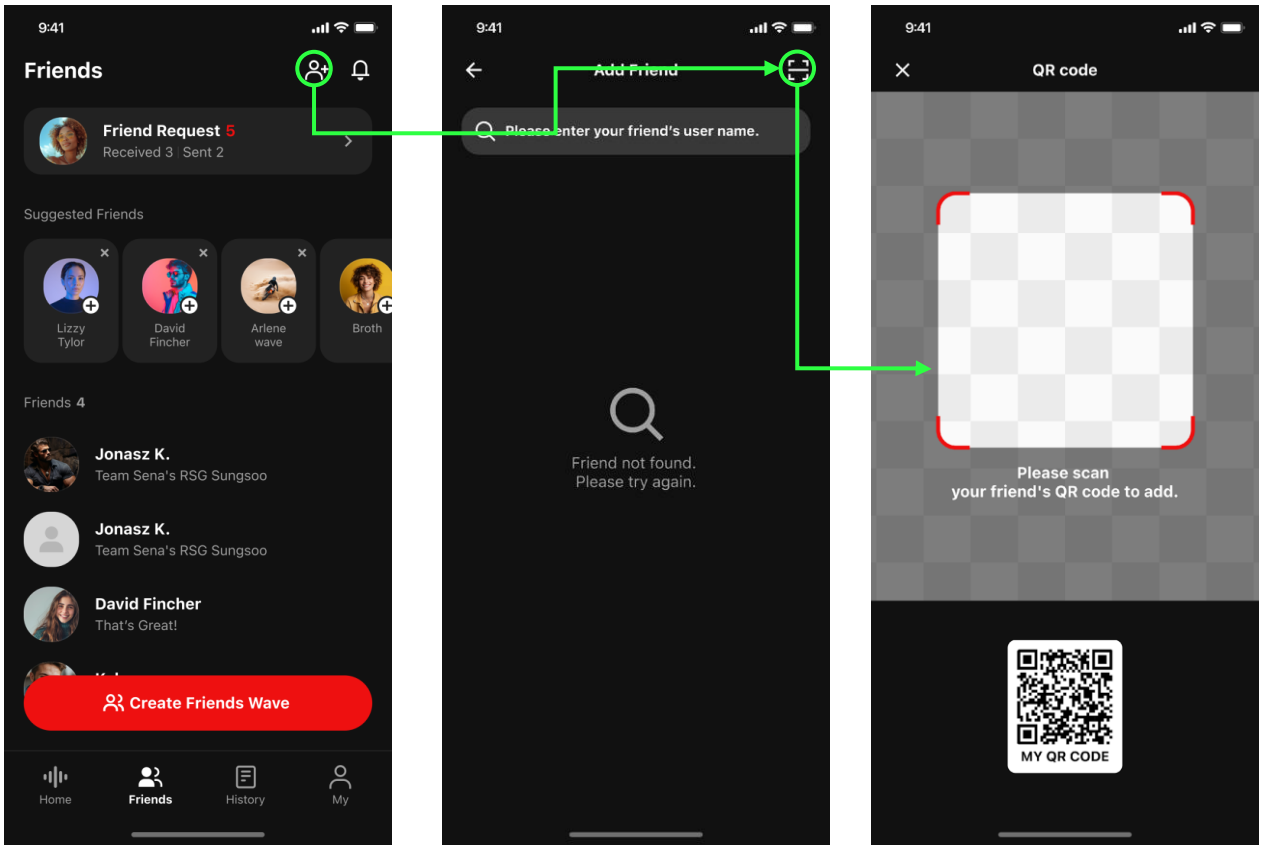

1. Tap the **Create Friends Wave** button on the Friends Tab.
2. Select the people you want to chat with.
3. Tap the **Start** button.

- **Instant Start from Geo Wave**

1. Tap the **Grouping** button on the Geo Wave map.
2. The Friends Wave will be instantly created with users within the Wave Zone.

How to Add Friends on Wave Intercom

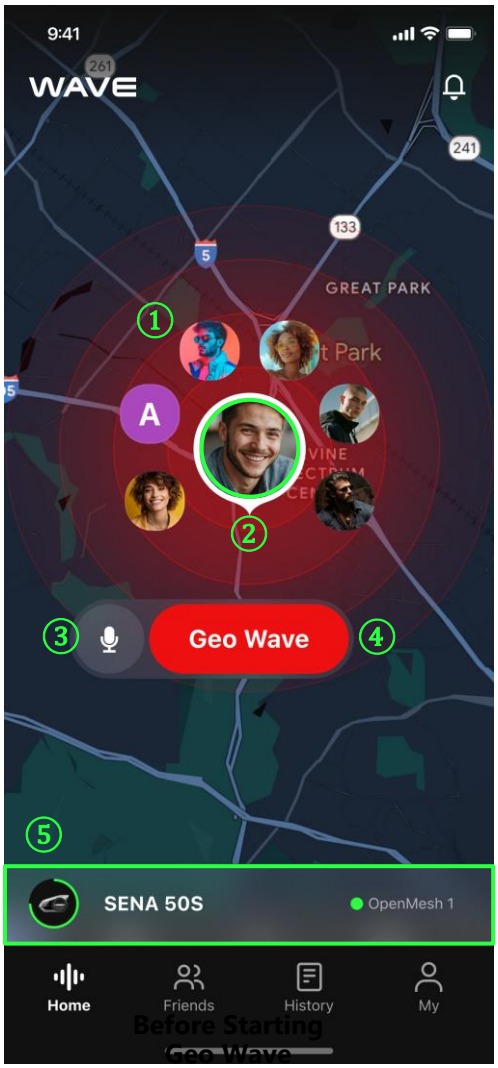

1. Go to the Friends tab.
2. Tap , and then in the upper right corner.
3. Scan the QR code on your friend's screen.

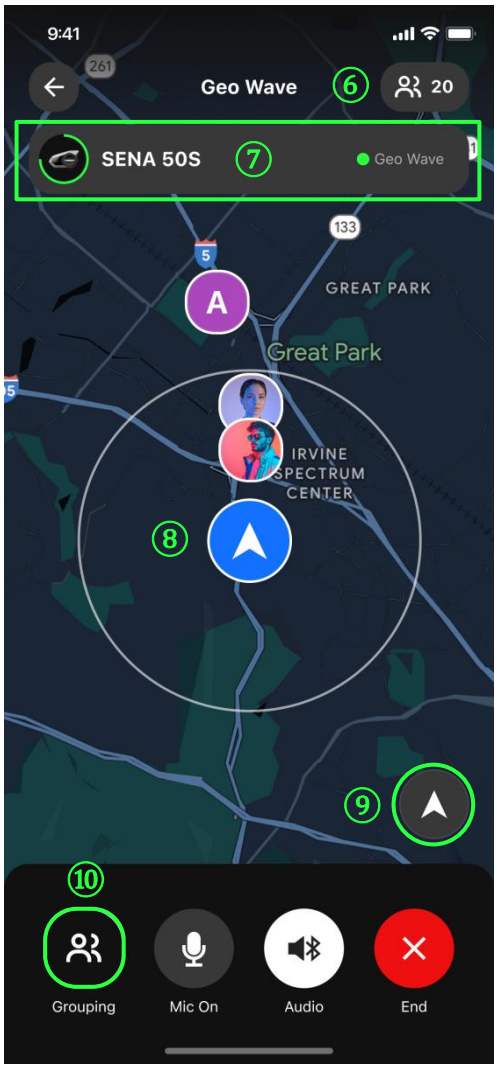

What's good about adding friends?

- Even if you move out of the Wave Zone, the connection won't drop.
- The Wave Zone extends to a 5-mile(8-km) radius.
- Users who're not on your Friends list will lose connection beyond a 6-mile (10-kim) radius.

When creating a Friends Wave

1. Tap ⚙ in the upper right corner.
2. Tap ✎ to change the group name or 📷 to change the profile picture.

Detailed Instructions

Check your location on the map

There are two types of compass icons in the bottom right corner to show your location on the map. You can switch the icons by tapping them.

Head-up (Default)

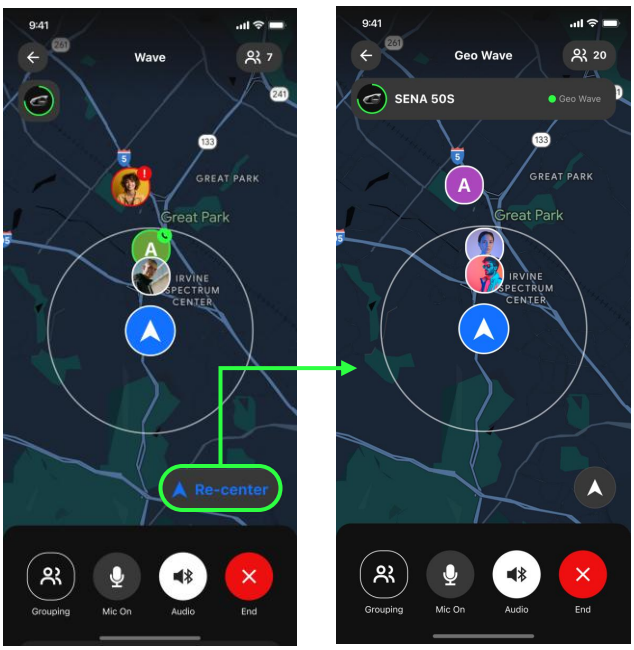

The map automatically rotates to match the direction you're heading.

North-up

The blue arrow rotates to indicate your direction, while the map remains fixed.

Relocate to your current location

If you zoom, rotate, and pan the map to check the surrounding areas, the compass icon will turn into Re-center.

1. Tap the **Re-center** button.
2. The map will adjust to show your current location.
