Eurol Demineralized Water

Demineralised water

Description

Eurol Demineralised Water is demineralised water from which nearly all salts and other impurities have been removed. Because of this, Eurol Demineralised Water will not form (scale) deposits, so blockages will be avoided and an optimal heat-transfer can take place.

Eurol Demineralised Water is used in several production processes, as well as in steam-irons, batteries, air-humidifiers and in laboratories.

Physical properties

Density at 20°C	0.998 kg/l	ASTM D 1298
pH	7
